Modern Removable Partial Dentures

A one day hands-on course in London

with 6.5 hours enhanced CPD

The aim of this one day course is to demonstrate the place for RPDs as serious contenders in the restorative range of treatment options with the need to focus on hygienic design principles in accordance with modern concepts of preventative dentistry.

Specific objectives of the day are to familiarise the delegates with current thinking in RPD planning, treatment and maintenance together with a practical approach to RPD design: a logical design sequence and realistic colour design illustrations.

The lectures will include patient examples of RPDs with cast frameworks, acrylic resin bases & RPDs with precision attachments and be interspersed with hands-on exercises.

RPD variations and complexity

Dr Charlotte Stilwell

is a specialist in prosthodontics. She qualified from the Royal Dental College in Copenhagen in 1983 and moved to London to pursue her interest in removable prosthodontics. After five years of post-graduate training in the Prosthetic Department, Royal London Hospital Dental School she practiced for nine years in general practice in West Wickham, Kent. Since 1997, she has practiced as a referral specialist in Harley Street in London. Charlotte has an interest in both conventional and implant prosthodontics and management of occlusion and over the past 30 years she has lectured and published in all of these areas. Charlotte is a senior lecturer at the Division of Gerodontology and Removable Prosthodontics, University of Geneva and examiner for the Royal College of Surgeons Edinburgh. She is also a fellow of the International Team for Implantology (ITI) and a member the ITI Board of Directors.

AIMS & OBJECTIVES

> Discuss and better understand indications, assessment and planning of partial dentures.
> Understand and improve design of hygienic and adaptable partial dentures.
> Better prescribe tooth modifications for partial dentures.

ANTICIPATED OUTCOMES

At the end of the course delegates should be able to:

> Assess and plan partial dentures.
> Design hygienic & adaptable partial dentures.
> Prescribe suitable tooth modifications for partial dentures.
> Have happier patients with improved outcomes.
> Better communication with your dental technician.
