Schottlander *Soft Touch* Flexible Nitrile

The New Generation of Nitrile Gloves

Previously, nitrile examination gloves could be thick and inflexible, making them uncomfortable to wear and with bad tactile control.

Schottlander Soft Touch Flexible Nitrile are the New Generation of nitrile gloves, with touch and comfort closer to latex than old style nitrile. Call us for a free samples to try them for yourself.

Value

Old style nitrile examination gloves were traditionally much more expensive than latex gloves, so switching to them was an additional cost.

NEW Schottlander Soft Touch Flexible Nitrile Examination gloves are made using advanced manufacturing techniques and packed in boxes of 200. Prices are comparable to many latex gloves and substantially less than even many low quality nitrile gloves.

Why Nitrile and Not Natural Rubber Latex Gloves?

Glove wearing, however essential, has resulted in many peoples hands becoming sensitised. Their hands can become sore, red and itchy and in severe cases blisters can develop. Other symptoms like breathing difficulties, sore eyes and runny noses may also occur.

Studies have shown that up to 18%⁽¹⁾ of healthcare workers suffer from some of these problems. These effects are unpleasant, embarrassing and in rare cases potentially life threatening.

Schottlander Soft Touch Flexible Nitrile Gloves not only eliminate latex allergy issues, but also provide flexibility and tactile control that is a major step closer to the feel of latex.

Comfort and Fit

Often you wear gloves for a major part of your day so comfort cannot be overstated. Palm width and finger length have been designed to reduce fatigue to a minimum, a range of five sizes from extra small to extra large is available.

Strong yet with a Softer Feel

Greater Flexibility and Better Tactile Control

Improved Grip and Reinforced Cuffs

Schottlander Soft Touch Flexible Nitrile Gloves have textured fingers for better grip when working with small objects, the Nitrile rubber has also been developed to give a better feel and enhanced tactile control in both wet and dry conditions with a reinforced cuff for added strength when donning.

Physical Properties of Schottlander Soft Touch Flexible Nitrile Gloves:

Latex content:	Free
Latex protein content:	Free
Powder content:	Powder Free in accordance with ASTM D6124
Finger texture:	Textured
Conformance to standard:	EN 455

Glove Length:	min 240 mm
Glove design:	Ambidextrous with reinforced cuff
Sizes:	Extra small, small, medium, large, extra large
Number in box:	200 gloves

Figures quoted are typical values. Our policy is one of continuous product development. This may result in the above specifications changing.

Why do some people have adverse reactions to their gloves?

Allergic reactions to Natural Rubber

Immediate Hypersensitivity (Type I) reaction occurs shortly after a latex glove is put on by a sensitised person. It usually manifests itself as a result of repeated exposure to excessive levels of latex protein. Symptoms range from rashes and irritation around the glove contact area, to rhinitis and occasionally anaphylaxis.

Schottlander Soft Touch Flexible Nitrile Gloves contain no natural rubber latex or NRL proteins.⁽²⁾

Reaction to Residual Chemicals

Delayed Hypersensitivity (Type IV) reaction occurs with in 6-48 hours of contact with the glove. It can be caused by exposure to traces of some chemicals used in the manufacture of gloves, such as thiurams and thiasoles. It causes red, itchy blotches on the hands, sometimes spreading up the arm.

Schottlander Soft Touch Flexible Nitrile Gloves do not contain such chemicals, as confirmed in independent testing⁽²⁾.

Now with even Better Tactile Control
100% Flexible Nitrile Examination Gloves

NOW available in Pink and Blue

Glove Innovation & the Queen's Award

The innovation of Schottlander Low Allergy Gloves has been formally recognised by the receipt of a Queen's Award in 2000. Since then Schottlander gloves have got even better with the introduction of product enhancements and greater choice.

Schottlander Soft Touch Flexible Nitrile Gloves

Schottlander Soft Touch Flexible Nitrile are the New Generation of nitrile gloves, with touch and comfort closer to latex than old style nitrile. Made using advanced thin film technology, they combine enhanced flexibility and fingertip control with outstanding barrier properties.

Available in Pink and Blue in sizes: XS, S, M, L & XL (XL blue only). Box of 200.

Schottlander Flexible Nitrile Gloves

Schottlander Flexible Nitrile Gloves answer the need of latex free glove wearers for a more flexible nitrile glove with greater tactile control. In the past nitrile gloves have tended to be hard and inflexible, with poor sense of touch for the wearer. Schottlander Flexible Nitrile Gloves are a major step closer to the tactile feel of latex.

Available in: XS, S, M, L & XL. Box of 100.

Schottlander LA Low Allergy Examination Gloves

Schottlander LA Low Allergy Powder Free Examination Gloves provide a consistently higher quality product which is stronger and has guaranteed low residual chemical and protein levels. They are made from the highest grade latex and carefully designed ceramic formers and are now even easier to don. With textured fingers, reinforced cuffs and a unique surface treatment they guarantee optimum grip and better feel whilst having a non-tacky surface, ideal when working in a wet field environment. Available in: XS, S, M, L & XL. Box of 100.

Schottlander Comfort-LX LA Low Allergy Gloves

Schottlander Comfort-LX LA Low Allergy Powder Free Examination Gloves are softer and thinner for greater comfort, specifically designed to reduce hand fatigue. Made by using advanced thin film technology, with a silky smooth inner surface and enhanced tactile control.

Available in: XS, S, M & L. Box of 100.

Schottlander Aloe Gloves Soft

Schottlander Aloe Gloves Soft have the high quality you would expect from Schottlander but also contain Aloe Vera and Vitamin E. This innovative combination of natural moisturisers helps protect and nourish your hands while the glove provides the barrier protection you and your patients deserve. The inner coating offers superior donning and soothing comfort during extended wear. Regular use of Schottlander Aloe Gloves Soft should bring positive results for most users resulting in smoother and healthier hands. Available in: XS, S, M & L. Box of 100.

Schottlander LA Low Allergy Procedure Gloves

Schottlander LA Low Allergy Powder Free Procedure Gloves are made thicker to give greater strength and added protection during long procedures. Manufactured using carefully designed ceramic formers, in a range of eight sizes ranging from 5.5 to 9. Schottlander LA Low Allergy Powder Free Procedure Gloves give outstanding comfort and fit. With textured fingers, longer reinforced cuffs and 100% tested for holes for greater piece of mind.

Available in: 5.5, 6, 6.5, 7, 7.5, 8, 8.5 & 9. Box of 25 pairs.

Which type should I order?

The choice is yours, but should you require any help or advice, please call to speak to our experienced advisors. If you would like to try samples of any of our gloves, then tell us and we shall be happy to send them to you. If you feel uncertain about your choice and size, then call us on Freephone 0800 97 000 79 for advice.

Schottlander wall-mounted glove dispensers

Schottlander wall-mounted glove dispensers are hospital grade, made of nylon coated wire and can be disinfected by all commonly used surgery cleaning products. They fit all glove boxes in the Schottlander range, and allow surgeries to wall mount their glove boxes in compliance with HTM 01-05.
