## Pillars of Denture Wisdom

Giving your patients  
truly aesthetic and  
functional dentures

This day is aimed at igniting your enthusiasm and love for removable prosthodontics, showing how we can change our patients' lives with beautifully made dentures. In this one day seminar Finlay will present his methods and techniques used to deliver dentures with superb aesthetics and optimal function. Finlay will cover complete dentures, partial dentures and implant retained dentures. This day is designed for all experiences of dentists, prosthodontists, clinical dental technicians, dental technicians, dental nurses and other interested members of the dental team. It will be a practical and clinically useful presentation; illustrated with photographs and videos showing how

Finlay and his dental technician, Rowan Garstang, produce the following types of removable dentures exhibiting superb form and function;

1. Complete dentures
2. Partial dentures
3. Implant supported dentures

Finlay says, "I used to worry when providing dentures for my patients as success was so unpredictable. After dedicating the last 20 years to this discipline, although I still find them challenging, I now love making them and it is all I do in my clinical practice. Additionally, I love teaching dental professionals exactly how we do it. I am so fortunate in having one the world's finest dental technicians, Rowan Garstang, working in the next room. Since 2007 we have made over 400 sets of dentures in our practice and none of our patients (to our knowledge) have required dental implants to support our dentures afterwards."

## Aims, Objectives & Anticipated Outcomes

At the end of the seminar delegates should be able to:

- > Have improved understanding of state-of-the-art complete denture, partial denture and implant supported denture construction.
- > Have increased understanding of impression techniques and accurate recording of centric relation with gothic arch tracing.
- > Learn how to maximise complete denture retention & stability.
- > Have improved ability to make dentures look like beautiful natural teeth.
- > Learn how to use attachments such as Locators® in the best way.
- > Learn how to make dentures fit implants and the supporting soft tissues properly.
- > To see the construction methods & function of partial dentures which work like removable bridges, protecting the periodontium of compromised abutment teeth.
- > To appreciate that well designed and well-made removable dentures are a valid alternative to implant supported restorations.
- > To learn a system of partial denture design which anticipates future abutment failure allowing artificial tooth additions onto cobalt chromium minor connectors of the denture at a later date.
- > Have improved patient outcomes with patients through enhanced clinical techniques and patient management.
- > Have improved understanding of metal reinforcement to strengthen the dentures.
- > Have improved communication with the dental technician.

## Dr Finlay Sutton

BDS, DGDP (UK),  
MSc, MFDS RCS Ed,  
MRD RCS Ed, PhD,  
FDS (Rest Dent)  
RCS Ed. Registered  
Specialist in Restorative  
Dentistry, Prosthodontics,  
Endodontics & Periodontics.

Finlay qualified as a dentist in Sheffield in 1993 and worked in General Dental Practice for 6 years.
