

1. INDENTIFICATION OF SUBSTANCES / PREPARATION AND COMPANY

Product Name: Mercury in Capsules
Product Code: 124, 125, 126, 015, 018

Application: Dental filling material

Company: Davis Schottlander & Davis Ltd

Fifth Avenue, Letchworth Garden City,

Herts SG6 2WD UK

Tel: +44 (0)1462 480848 Fax: +44 (0)1462 482802 msds@schottlander.co.uk www.schottlander.com

Date: 22.11.2015 Version 3.0

2. HAZARD IDENTIFICATION

Classification of the substance or mixture

Product definition:

Capsules containing mercury (Hg) to be mixed with Dental Alloy to make filling material for teeth.

Classification according to Regulation (EC) No. 1272/2008 [CLP/GHST]

H330 - Fatal if inhaled.

H360D - May damage unborn child.

H372 - Causes damage to organs through prolonged or repeated exposure.

H410 - Very toxic to aquatic life with long lasting effect.

Label elements

Hazard pictograms:

Signal word : Danger

Hazard statements: H330 - Fatal if inhaled.

H360D - May damage the unborn child.

H372 - Causes damage to organs through prolonged or repeated

exposure.

H410 - Very toxic to aquatic life with long lasting effects.

Precautionary statements

General: P201 – Obtain special instructions before use.

P260 - Do not breathe dust/fume/gas/mist/vapours/spray.

P273 – Avoid release to the environment.

P284 – Wear respiratory protection.

P310 – Immediately call a POISON CENTRE or doctor/physician.

P501 – Dispose of contents and container in accordance with all local, regional,

national and international regulations.

P281 – Use personal protective equipment as required.

P304+P340 – If INHALED Remove person to fresh air and keep comfortable for Breathing.

P403+P233 – Store in a well ventilated place. Keep container tightly closed.

Hazardous ingredients: Mercury **Supplemental label elements:** Not applicable

Other hazards which do not result in classification: None

Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006 Annex XIII: Not applicable

Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006 Annex XII: Not applicable

3. **COMPOSITION / INFORMATION ON INGREDIENTS**

Substance/mixture: Capsules containing mercury (Hg).

			<u> </u>	
Product/ingredient	Indentifiers	%	Classification	Туре
name			Regulation (EC) No.	
Europe	0800-001-00-099-9			
Mercury	CAS: 7439-97-6		H330; H360; H372; 410	[1]

Type

1. Occupational exposure limits, if available, are listed in Section 8.

4. FIRST AID MEASURES

Description of first aid measures:

Eye contact: Check for and remove any contact lenses. Rinse with plenty of running

water. Seek medical attention.

Inhalation: Allow the victim to rest in a well ventilated area. Get medical attention

immediately.

Skin contact: Wash contaminated skin with soap and water. Remove contaminated

clothing and shoes.

Ingestion: Have conscious person drink several glasses of water or milk. Get medical

attention immediately. Subsequently administer: activated charcoal (20-40g

in 10% slurry).

Protection of first-aiders:

Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapours below their respective occupational exposure limits. In the event of a large spill wear special protective clothing and positive pressure, self-contained breathing apparatus.

Most important symptoms and effects both acute and delayed Potential acute health effects

Eye contact: Not available.

Inhalation: H330- very toxic by inhalation. H360- May cause harm to the unborn child.

Skin contact: May be harmful in contact with skin.

Ingestion: H372- Causes damage to organs through prolonged or repeated exposure.

Indication of any immediate medical and special treatment needed

Notes to physician: Call local Poison Control Centre for assistance.

Specific treatments: Not available.

5. FIRE FIGHTING MEASURES

Extinguishing media

Suitable extinguishing media: Use extinguishing media suitable for surrounding materials.

Unsuitable extinguishing media: Not applicable

Special hazards arising from the substance or mixture

Hazards from the substance or mixture: No specific fire or explosion hazard.

Hazardous thermal decomposition products: Mercury vapour.

Advice for fire-fighters

Special protective actions for fire-fighters: Avoid breathing dusts, vapours or fumes

from burning materials.

Special protective equipment for fire-fighters: Fire-fighters should wear appropriate

protective equipment and self-contained breathing apparatus (SCBA) with a full facepiece operated in positive pressure mode.

Additional information: None

6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures

For non-emergency personnel: Wear suitable gloves and eye/face protection. For emergency responders: Wear suitable gloves and eye/face protection. Environmental precautions: Do not allow to enter drains or watercourses.

Methods and materials for containment and cleaning up

Small spill: Small droplets of spilled mercury can be collected with the aid of 'mercury-

collecting forceps' or a small amount of freshly mixed amalgam that will

easily absorb liquid mercury. NEVER use a vacuum cleaner!

Large spill: Evacuate surrounding areas. Do not clean up spills or dispose of except

under supervision of a specialist. Consult your local or regional authorities.

Reference to other sections

See Section 8 for information on appropriate personal protective equipment.

See Section 13 for additional waste treatment information.

7. HANDLING AND STORAGE

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

Precautions for safe handling

Protective measures: Recommendations for safety precaution.

Dental clinical personnel, when using silver amalgam, should exercise procedures to avoid personal contact with mercury. Precaution should be taken to avoid exposure to mercury vapour in the dental environment. Waste amalgam should be collected for disposal in a manner which will protect both those who handle the waste and the environment:

- 1. Treat mercury and amalgam with care. Be MERCURY AWARE.
- 2. Handling of mercury and mixing of amalgam should be done on a separate section of the working table (not close to a source of heat) with raised edges on all sides. This will prevent any spilled mercury spreading and will facilitate its recovery. The surgery floor should be smooth, without cracks and the surgery well ventilated.

- 3. Ideally a high-energy mixer should be equipped with a protective cap to recover the capsule whilst mixing.
- 4. Small droplets of spilled mercury can be collected with the aid of 'mercury-collecting forceps' or a small amount of freshly mixed amalgam that will easily absorb liquid mercury. NEVER use a vacuum cleaner!
- 5. Removal of amalgam fillings must be done under water cooling and with effective suction. The use of eye protection and mouth mask is advisable.
- 6. The waste water drain of the spittoon should be equipped with an amalgam separator. Local regulations on the type and installation of such separator and handling/recycling of the amalgam waste should be taken into consideration. For details see for example JADA, August 2003, KEVIN R. MACMNUS, M.A., M.B.A., P.L. FAN, Ph.D. "Purchasing, installing and operating dental amalgam separators, Practical issues".
- 7. Excess mixed amalgam should be kept in a special 'Mercontainer' or at least in a closed container filled with photographic fixer.
- 8. Empty capsules may retain product residues and can be hazardous.

Advice on general occupational hygiene: Avoid breathing dust.

Conditions for safe storage including any incompatibilities: Store in a dry, cool well-ventilated area.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

The information in this section contains generic advice and guidance. The list of Identified Uses in Section1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

Control parameters

Occupational exposure limits

Europe

Mercury EU OEL (Europe, 9/2006)

TWA: 0,02 mg/m³ 8 hour(s)

Recommended monitoring procedures: Dräger Mercury vapour detection tube

DNELs/DMELs: No DNELs/DMELs available.

PNECs: No PNECs available.

Exposure controls

Appropriate engineering controls: Use only with adequate ventilation.

Individual protection measures

Hygiene measures: Not applicable.

Eye/face protection: Safety glasses with side-shields.

Skin protection

Hand protection: Chemical-resistant, impervious gloves complying with an

approved standard should be worn at all times when handling chemical products if a risk assessment indicates

this is necessary.

4-8 hours (breakthrough time): nitrile rubber 1-4 hours (breakthrough time): PVC butyl rubber

Body protection: Lab coat.

Other skin protection: Wash with soap and water.

Respiratory protection: Ventilation is normally required when handling or using this

product.

Environmental exposure controls:

Avoid release to the environment. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. No special protection is required.

9. PHYSICAL AND CHEMICAL PROPERTIES

Information on basic physical and chemical properties.

Appearance:

Physical state: Liquid
Colour: Silver
Odour: Odourless
pH: Not applicable
Melting/freezing point: -39°C 9 -38.2°F)

Initial boiling point &

boiling range: 357°C (674.6°F) **Flash point:** No results available.

Vapour pressure: 0.0002 kPa (0.0002 mm Hg) (at 20°C)

Vapour density: 6.9 (Air = 1)

Relative density: 13,6

Solubility in water: Non water soluble liquid

Partition coefficient:

n-octanol/water: The product is more soluble in octanol; log(octanol/water) = 4.5

Auto ignition temp: No results available.

Decomposition temp: No results available.

Viscosity: No results available.

Oxidising properties: Not applicable.

Other information: No additional information.

10. STABILITY AND REACTIVITY

Reactivity: No additional information.
Chemical stability: The product is stable.
Possibility of hazardous reactions: The product is stable.

Conditions to avoid: Keep away from heat and flame. Avoid release to

the environment.

Incompatible materials: Not applicable.

Hazardous decomposition products: Mercury vapour.

11. TOXICOLOGY INFORMATION

Information on toxicological effects

Acute toxicity: No results available. Irritation/Corrosion: No results available. Sensitisation: No results available. Mutagenicity: No results available.

Carcinogenicity: Not classified or listed by IARC, NTP, OSHA, EU and ACGIH.

Reproductive toxicity: No results available. **Teratogenicity:** No results available.

Potential acute health effects

Eye contact: Not available.

Inhalation: H330 - Very toxic by inhalation. H360D - May damage unborn child.

Skin contact: May be harmful in contact with skin. **Ingestion:** Possible risk of irreversible effects.

Potential chronic Chronic or excessive over-exposure may cause symptoms of **health effects:** mercury poisoning with muscle tremors, visual disturbance and

kidney effects.

Other information: RTECS: OV4550000

12. ECOLOGICAL INFORMATION

Toxicity

Ingredient nameSpeciesPeriodResultMercuryDaphnia (EC50)48 hours0.0052 mg/lMercuryFish (LC50)96 hours0.35 mg/l

Persistence & degradability: Not applicable. Bioaccumulative potential: Not applicable. Mobility in soil: Not applicable.

Results of PBT & vPvB assessment

PBT: Not applicable. vPvB: Not applicable.

Other adverse effects: Toxic to aquatic organisms, may cause long-term adverse

effects in the aquatic environment.

13. DISPOSAL CONSIDERATIONS

Waste treatment methods:

Product

Methods of disposal: Dispose of via a licensed waste disposal contractor.

Hazardous waste: The classification of the product may meet the criteria for a

hazardous waste.

European waste catalogue (EWC)

Waste Code Waste designation

18 01 10* Amalgam waste from dental care

Packaging

Methods of disposal: Dispose of via a licensed waste disposal contractor.

Special precautions: Avoid breathing dust.
